

Captain Jorgensen

M45 responded yesterday to C Street in Blaine (BY51069), along with A61. Happened to be my mother, who collapsed while vomiting, and was found by her co-workers. She came to after about 30 seconds or so, but definitely had the office staff all worked up.

Just wanted to express my thanks to the crews, who went above and beyond. After checking her out, they remained on scene, helped schedule an immediate appointment with her doctor, and assisted her into her truck, so a co-worker could drive her into Bellingham for the appointment. Your crew's customer service skills are to be commended. (And hopefully duplicated by the rest of us).

The doctor didn't find anything yet, except that she hadn't eaten. She's got an echo cardiogram scheduled, and we'll have to keep an eye on her for a while.

Not often we get stories like that, so I thought I'd better shoot you a message.

Thanks again,

David Moe
